-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 20 December 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

## DETAILED ACTION

### *Specification*

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21-46 are rejected under 35 U.S.C. 102(b) as being anticipated by Miller et al. (US Patent Number 5,250,058).

Miller et al. disclose a method for anastomosing a first hollow vessel to a second hollow vessel having an opening, the method comprising the steps of providing an anastomosis device having a plurality of slots, 34, and a plurality of staple members, 24, each having a first end and a second end the staple members comprised of a material

Art Unit: 3733

capable of being biased from an unbiased configuration to a biased configuration, each separate staple member being configured to be at least partially disposed within a separate one of the plurality of slots, holding the plurality of staple members in the biased configuration in the plurality of slots, inserting at least the first ends of the plurality of staple members through the opening in the second hollow vessel while the plurality of staple members are in the biased configuration and permitting the plurality of staple members to move from the biased configuration to the unbiased configuration, wherein the first ends of the staple members do not penetrate through the wall of the second hollow vessel when the staple members are permitted to move from the biased configuration to the unbiased configuration, wherein the anastomosis device comprises a tubular member, 20, having a plurality of slots, wherein the inserting step comprises inserting the first ends of the staple members from an exterior surface of the first hollow vessel toward an interior surface of the first hollow vessel, wherein the anastomosis device comprises at least one flange having a plurality of holes that are aligned with the plurality of slots (see figure 12), wherein the anastomosis device comprises a sleeve, 50, having at least one plunger, 60, slidably disposed therein within at least one of the plurality of slots, and comprising the step of moving the at least one plunger within the at least one of the plurality of slots to displace at least one staple member from a first position, where at least a portion of the at least one staple member is within the at least one of the plurality of slots, to a second position, where at least a portion of the at least one staple member is outside the at least one of the plurality of slots, wherein the

plurality of staple members are disposed about a perimeter of the first hollow vessel and outside the lumen of the first hollow vessel (see figures 1-2, and 6-12).

### ***Response to Arguments***

Examiner acknowledges applicant's response filed on December 20, 2005, where applicant stated that claims 1-20 had been cancelled and claims 21-46 had been added.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Annette R. Reimers whose telephone number is (571) 272-7135. The examiner can normally be reached on Monday-Friday.
